

Tournament Special

0-0-13

Tournament Special (0-0-13) is a unique blend of potassium, calcium, silica, iron and organic acids formulated to create a more playable and stress resistant turf. Plants develop a compact, upright and rigid growth habit which increases overall turf uniformity and resistance to wear. **Tournament Special** can reduce "grain" and minimize the effects of spike and ball marks. It may also maintain favorable green speed at higher heights of cut. **Tournament Special** is particularly effective when used on greens and tees prior to and during tournaments and other heavy use periods, or it can be used as part of a regular turf fertility program.

Benefits of Use

- Increases strength and resilience of turf, especially under heavy play
- Reduces ball and spike marks
- Improves playability of golf greens (may increase green speed)
- Creates a more consistent surface
- Increases turf tolerance to multiple stresses

Problem Conditions Improved w/ Tournament Special

- Reduced turf vigor due to heavy traffic or excessive wear
- Periods of heavy play such as tournaments
- Golf greens with suboptimum ball-roll characteristics due to texture differences, "grain", etc.
- Uneven turf
- Slow healing ball marks or spike marks

Guaranteed Analysis

Soluble Potash (K₂O).....13.00%

Derived From
Potassium Hydroxide

This product also contains approximately 0.6% Ca, 0.3% Si, 0.5% Fe, and organic acids derived from composting.

Physical Characteristics
9.5 lb./gal; pH 13.8

CONDITIONS OF SALE

1. Douglass Fertilizer & Chemical, Inc. (DFC) warrants that this product consists of the ingredients specified and is reasonably fit for the purpose stated on this label when used in accordance with the directions under normal conditions of use. No one other than the officer of DFC is authorized (and such authorization must be in writing) to make any other warranty, guarantee or direction concerning this product.

2. Because the time, place, rate of application, weather conditions and normal or abnormal conditions of use or storage are beyond DFC's control, DFC's liability is limited to replacement of product or refund of purchase price. In no event shall DFC be liable for indirect or consequential damages.

Application Instructions

Apply 3-6 oz. of **Tournament Special** in 2.5 gal of water per 1000 sq. ft. of turf, or 1-2 gallons of product in 50 gallons of water per acre. One gallon of Tournament Special (0-0-13) contains 1.23 lb. of Potassium as K₂O.

In its concentrated form **Tournament Special (0-0-13)** is very alkaline. Care and safety should be taken during handling. Goggles, gloves, and protective clothing should be worn. Consult MSDS if necessary.

When mixing with other products it is suggested that you jar test any combination of products before mixing large volumes. Adequate tank agitation should be provided to insure complete mixing. If any doubt exists about a particular blend of products, apply to a test area first for evaluation.

Shake well before using.

PACKAGE AVAILABILITY

Tournament Special is available in:

- 2 x 2.5 Gallon Case
- 30- Gallon Drum

Handling and Storage

Store between 40-90° F. Avoid direct heat or fire. Decomposition may occur at high temperatures (above 225° F.). Do not freeze!

Keep out of reach of children. Harmful if swallowed. Avoid inhalation, eye contact, or ingestion. Avoid prolonged or repeated contact with skin which may cause irritation. Wash thoroughly after handling. Corrosive.
