

# Super 15-0-0

## Plus 6% Chelated Iron

**Super 15-0-0** is a formulation of essential iron, sulfur and nitrogen. Iron is the most commonly deficient micronutrient in turf. A deficiency is often caused by insolubility rather than a lack of iron in the soil. Soil Characteristics causing this condition include alkalinity, high organic matter, poor drainage, or high levels of Mn, P, Zn, of As. Symptoms include interveinal chlorosis (yellowing) of young leaves turning white in advanced stages. Necrotic lesions are occasionally present. Thin, weak growth often results. **Super 15-0-0** contains a proprietary combination of citric, fulvic, and other organic acid chelates to stabilize each nutrient and to enhance its uptake and translocation in the plant. **Super 15-0-0** is compatible with most pesticides and fertilizers with the exception of amino formulations and high phosphate fertilizers.

### Benefits of Use

- Superior color without significant nitrogen
- Rapid response from foliar uptake
- Enhanced root uptake from humic acid
- Vigorous turf growth

Problem Conditions Improved with Super 15-0-0

- Off-color or chlorotic turf due to iron deficiency

### Guaranteed Analysis

Total Nitrogen (N).....	5.00%
15.00% Water Soluble Organic Nitrogen (and/or Urea Nitrogen)	
Iron (Fe).....	6.00%
6.00% Chelated Iron	
Sulfur Combined as S.....	4.00%

Derived From  
Urea, Ferrous Sulfate

Physical Characteristics  
11.0 lb./gal. (1.65 lb. N/gal)

Contains a 22% Organic Material from Fulvic Acid

### CONDITIONS OF SALE

1. Douglass Fertilizer & Chemical, Inc. (DFC) warrants that this product consists of the ingredients specified and is reasonably fit for the purpose stated on this label when used in accordance with the directions under normal conditions of use. No one other than the officer of DFC is authorized (and such authorization must be in writing) to make any other warranty, guarantee or direction concerning this product.

2. Because the time, place, rate of application, weather conditions and normal or abnormal conditions of use or storage are beyond DFC's control, DFC's liability is limited to replacement of product or refund of purchase price. In no event shall DFC be liable for indirect or consequential damages.

### Application Instructions

Apply 3 oz. per 1000 sq. ft. of turn in 2.5 gal. Of water per month, or 1 gal. per acre diluted in 50 gal. of water per month. (3 oz. per 1000 sq. ft. supplies 0.03 lb. N per 1000 sq. ft.) Do not water turf for 24 hr. after application. This product should be used as a supplement to a regular fertility program.

It will not by itself provide all the nutrients normally required by plants. A pre-mix "jar test" is recommended to check compatibility of product combinations that have not been previously tested.

Shake well before using.

### PACKAGE AVAILABILITY

**Super 15-0-0** is available in:

- 2.5 gallon jug (2 per case)
- 5 gallon pail
- 30 gallon drum
- 275 gallon mini bulk

### Handling and Storage

Store between 40-95° F. Avoid direct heat or fire. Decomposition may occur at high temperatures (above 225° F.). Do not freeze!

Keep out of reach of children. Harmful if swallowed. Avoid inhalation, eye contact, or ingestion. Avoid prolonged or repeated contact with skin which may cause irritation. Wash thoroughly after handling. Corrosive.
