

Enviro-Plex

Enviro-Plex is an auxiliary soil and plant substance, which can be combined with liquid fertilizers during the formulation process, or it can be applied directly to the soil. **Enviro-Plex** is made of 22% organic acids which may aid in soil micronutrient, potassium, phosphate and calcium availability. **Enviro-Plex** stays persistent in soil and provides soil buffering, root stimulation and improved drought tolerance. Because of the high analysis of organic acids you may be able to reduce the amount of nitrogen fertilizer applied by 20-25%.

Enviro-Plex is recommended for fertigation, direct injection into the root zone or spot treatment of weak areas. For best results application should be made early in the season. **Enviro-Plex** is compatible with most organic fertilizer solutions when adequate agitation is used during mixing. Do not use with calcium nitrate or high pH solutions. When mixing with AN-20 or 10-34-0 dilute the **Enviro-Plex** with an equal volume of water. While agitating, inject the fertilizing product into the **Enviro-Plex** and water mixture. **Enviro-Plex** is non-phytotoxic when used as directed

Derived From
Leonardite Ore

Physical Characteristic
10.75 lbs/gal

PACKAGE AVAILABILITY

Enviro-Plex is available in:

- 2.5 gallon jug (2 per case)
- 30 gallon drum
- 275 gallon mini bulk
- Bulk

Benefits of Use

- Increases nitrogen retention by 20-25%
- Higher potassium availability by 20-25%
- Improves micro-nutrient and phosphate availability
- Drastically increase calcium availability
- Stimulates plant root and shoot growth
- Enhances soil structure
- Protects sensitive root hairs from salt damage
- Enriches microbial activity
- Expands water retention

Application Instructions

Apply 6 oz. per 1000 sq. ft. of turf in 2.5 gallons of water per month, or 2 gallons per acre diluted in 50 gallons of water per month. May be effectively applied through irrigation. **Compatibility:** Always check compatibility with other products before mixing. Fertilizers with a pH of 4 or less may not be compatible. Do not apply with calcium based fertilizers. **Mixing instructions: 1)** Partially fill tank with fertilizer or water and start agitation. **2)** Add **Enviro-Plex** slowly to circulating mix. **3)** Fill tank and agitate thoroughly. This product should be used as a supplement to a regular fertility program. It will not by itself provide all the nutrients normally required by plants.

Shake well before using.

Handling and Storage

Store between 40-95° F. Avoid direct heat or fire. Decomposition may occur at high temperatures (above 225° F.). Do not freeze!

Keep out of reach of children. Harmful if swallowed. Avoid inhalation, eye contact, or ingestion. Avoid prolonged or repeated contact with skin which may cause irritation. Wash thoroughly after handling. Corrosive.

CONDITIONS OF SALE

1. Liquid Ag Systems warrants that this product consists of the ingredients specified and is reasonably fit for the purpose stated on this label when used in accordance with the directions under normal conditions of use. No one other than the officer of Liquid Ag Systems is authorized (and such authorization must be in writing) to make any other warranty, guarantee or direction concerning this product.

2. Because the time, place, rate of application, weather conditions and normal or abnormal conditions of use or storage are beyond Liquid Ag Systems control, Liquid Ag Systems liability is limited to replacement of product or refund of purchase price. In no event shall Liquid Ag Systems be liable for indirect or consequential damages.
